

Senior Medical Science Liaison

The medimaps group is a pioneering leader in developing Software as a Medical Device (SaMD) solutions, using advanced AI to enhance diagnostic accuracy and improve patient outcomes. With a global presence spanning the US, Europe, and other regions, we are at the forefront of healthcare innovation, dedicated to transforming medical imaging and leading advancements in bone health diagnostics.

Position: Senior Medical Science Liaison (Senior MSL)

Location: Ideally located on the US East Coast or within the Eastern Time Zone Area

Start Date: 01 Jan 2025

Contract: Full time employment, remote/hybrid

Mission:

Reporting directly to the Head of Clinical Affairs and Research Innovation (CARI), the Senior MSL, will play a pivotal role in advancing medimaps' strategic medical initiatives across the USA, fostering awareness, education, and adoption of medimaps' SaMD technologies. This role focuses on establishing medimaps as a trusted authority in bone health diagnostics through high-impact engagement with healthcare professionals, policy influencers, and key opinion leaders (KOLs). As a vital contributor, you will identify unmet clinical needs, support market access strategies, and facilitate patient-centered outreach efforts.

Key Responsibilities:

- Expert Scientific Resource and Ambassador for Medimaps to cultivate and maintain strong relationships with healthcare professionals, patient advocacy groups, and medical societies.
- Scientific Exchange, Education, and Insight Generation to communicate the clinical value of Medimaps' offerings.
- Patient Advocacy and Community Engagement to reinforce medimaps' commitment to improved patient outcomes.
- Cross-functional Collaboration to align objectives and deliver cohesive patient-focused solutions.

What do you need to succeed?

- **Advanced degree** (PharmD, PhD, MD, MS or equivalent clinical qualifications).
- **Specialized knowledge in bone health and osteoporosis.**

- **Minimum of 3 years** of experience in a senior field-based medical affairs role within biopharmaceutical, medical device, or SaMD sectors.
- Familiarity with US regulatory and compliance requirements for industry interactions with healthcare professionals.
- **Scientific and Clinical Expertise:** Strong understanding of complex clinical data, bone health, and medical imaging, with an advantage if experienced with digital health platforms.
- **Communication Excellence:** Skilled in delivering impactful presentations and engaging with diverse audiences, including KOLs, healthcare professionals, and patient groups.
- **Adaptability:** Proven ability to succeed in a dynamic, fast-paced environment.
- **Strategic Thinking:** Strong project management, planning, and results-driven focus.
- **Patient-Centric Approach:** Commitment to patient outcomes, aligned with medimaps' mission and conscious capitalism principles.
- Ability to work autonomously while effectively collaborating with cross-functional teams.

What you can expect from us?

- As we work to develop patient centric solutions, we also work hard to care of our teammates' professional development, personal growth and well-being. As a key member of our CARI Team, you will be given every opportunity to make your mark and contribute to medimaps success in the USA.
- The security of working in an innovative and successful company with a sustainable business model.
- The opportunity to work on cross functional projects across teams and country-borders.
- Working with an international, multi-cultural and socially responsible company with meaningful corporate values and an inspiring mission.
- Working with a genuinely great bunch of talented, professional and friendly people, who work hard but know how to have fun and make work a real pleasure.
- An exciting company mission that brings together science and technology to directly impact the lives of patients.
